Eliminate Blind Spots With A Bird's Eye View

Now with AI
Obstacle Detection!

Revolutionize driving safety with our 360 Bird's Eye View System, now made even smarter with **Advanced AI Obstacle Detection**.

Prevent costly collisions and insurance hikes with this robust vehicle monitoring solution. Enjoy unparalleled visibility during low-speed maneuvers with image overlay technology and instantaneous reverse view, significantly reducing the risk of accidents involving parked vehicles and hidden obstacles.

Around Vehicle Monitoring

Four cameras that provide a 2D bird's eye (top view), as well as an ultra-wide single camera view.

AI Obstacle Detection

Seamlessly blends the 360-degree camera views with advanced AI functionality to identify obstacles all around the vehicle.

Full HD

Features 4 Full HD 1080P Fisheye Cameras & HD monitor. 6-Camera Option available for larger vehicles.

Auto Calibration

Calibration is performed simply and easily, directly through the system monitor.

"Instant Reverse"

The system activates the rear camera image with 2 seconds of ignition, enabling FMVSS-111 compliance.

Automatic Triggers

Set triggers to have the camera view change automatically (left/right/reverse/default).

On-Screen Vehicle Overlay

Customize the width, length, and position of the overlay for specific applications.

Two Monitor Sizes

Choose between a 7" or 10" HD monitor.
